TRIP HIGHLIGHTS

- Located between India and China, Nepal is approximately the size of Arkansas
 - Nepal has 1/3 of the Himalayas within its boundaries, including eight of the world's tallest mountains.
 - The republic of Nepal's health care system is predominately government funded but suffers from a lack of technology, hospitals and trained health care professionals.
 - Key health concerns in Nepal are maternal healthcare, immunizations, prevention of malaria, encephalitis, and HIV/AIDS
- You will visit a hospital, a free health clinic, a shelter, the Ayurvedic clinic, a high school and a psychiatric hospital.
- Sightsee in Kathmandu, Bhaktapur, Pokhara and Dhulikhel and learn about health from a psychological, sociological, and educational point of view.
