3. HAZARDS IDENTIFICATION

Route of Entry: Eyes, skin, inhalation, ingestion  
Target Organs:  
Inhalation: Inhalation of spray mist may cause irritation to the respiratory tract.  
Skin Contact: Repeated or prolonged contact with skin may cause mild irritation and possibly dermatitis.  
Eye Contact: Likely to cause immediate or delayed irritation. Irritation will show as redness and/or swelling of the eyes.  
Ingestion: Ingestion may cause irritation to the mouth, esophagus and stomach.
May aggravate pre-existing skin and respiratory disorders.

Notice: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

### 4 FIRST AID MEASURES

**Inhalation:** Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Continue to monitor. Get medical attention.

**Skin Contact:** Remove contaminated clothing immediately! Wash skin with soap and water. If irritation develops, seek medical attention.

**Eye Contact:** Flush eye(s) with water for 15 minutes. Get medical attention. If eye irritation persists, obtain medical treatment.

**Ingestion:** Do not induce vomiting! Get medical attention immediately!

### 5 FIRE FIGHTING MEASURES

**Flash point:** 155°F ASTM D-56 (TCC)

**Extinguishing Media:** Dry chemical, carbon dioxide or foam is recommended. Water may be ineffective for extinguishment, but can be useful in minimizing or dispersing vapors, protecting personnel and cooling containers. If containers are not properly cooled they can rupture in the heat of a fire. Avoid spreading burning liquid with water used for cooling purposes.

**Unusual Fire & Explosion Hazards:** Level 3 Aerosols - Contents Under Pressure!

### 6 ACCIDENTAL RELEASE MEASURES

Leaking aerosol cans should be put into suitable container until the internal pressure has dissipated. Use suitable absorbents to collect liquid product. Consult regulations for the disposal of the container, liquid and absorbents.

### 7 HANDLING AND STORAGE

**Handling Precautions:** Use in accordance with good industrial workplace practices. Avoid unnecessary contact. Wash thoroughly after handling. Use with good ventilation.

**Storage Requirements:** Store in a dry place away from excessive heat. Store containers with lids on and properly labeled.

Do not store at temperatures above 120 degrees F.
**EXPOSURE CONTROLS/PERSONAL PROTECTION**

**Engineering Controls:**
Eye wash stations and emergency showers should be immediately available.

**Protective Equipment:**
- **Eyes and Face:** Standard safety glasses with splash shields typically offer adequate protection. Where excessive splashing or spraying is possible, a face shield should be used.
- **Skin and clothing:** Excessive contact should be avoided. Neoprene gloves, boots and aprons will provide adequate protection when contact cannot be avoided. Remove and wash any contaminated clothing immediately. Wash thoroughly after handling.
- **Respiratory:** Good general ventilation should be sufficient to control airborne levels. Maintain airborne concentrations below OSHA established exposure limits of ingredients in Section 2.

**Exposure Guidelines/Other:**
The Blaster Chemical Companies takes no responsibility for determining what measures are required for personal protection in any specific application. This information should be used with discretion.
