Section IV — FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY CLASSIFICATION

FLASH POINT >200 °F NEC
LIE. N.A. OIL N.A.

Not Applicable

EXTINGUISHING MEDIA
Carbon Dioxide, Dry Chemical, Foam

INERTIAL FIRE AND EXPLOSION HAZARDS
Closed containers may explode (due to the build-up of pressure) when exposed to extreme heat.

SPECIAL FIRE FIGHTING PROCEDURES
Full protective equipment including self-contained breathing apparatus should be used. Water spray may be ineffective. If water is used, fog nozzles are preferable. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

Section V — HEALTH HAZARD DATA

ROUTES OF EXPOSURE
Exposure may be by INHALATION and/or SKIN or EYES contact, depending on conditions of use. To minimize exposure, follow recommendations for proper use, ventilation, and personal protective equipment.

ACUTE HEALTH HAZARDS

IRRITATION OF EYES, SKIN AND RESPIRATORY SYSTEM. In a confined area, vapors in high concentration may cause headache, nausea or dizziness.

SIGNS AND SYMPTOMS OF OVEREXPOSURE

Redness and itching or burning sensation may indicate eye or excessive skin exposure.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

None generally recognized.

EMERGENCY AND FIRST AID PROCEDURES

If INHALED: If affected, remove from exposure. Restore breathing. Keep warm and quiet.

If on SKIN: Wash affected area thoroughly with soap and water. Remove contaminated clothing and launder before re-use.

If in EYES: Flush with large amounts of water for 15 minutes. Get medical attention.

If SWALLOWED: Seek medical attention immediately.

CHRONIC HEALTH HAZARDS

Crystalline Silica (Quartz, Cristobalite) is listed by IARC. Long term exposure to high levels of silica dust, which can occur only when sanding or abrasing the dry film, may cause lung damage (silicosis) and possibly cancer.

No other ingredient in these products is an IARC, NTP or OSHA listed carcinogen.

The dust generated by these products is considered an animal teratogen. It has been shown to cause birth defects in rats and mice at high doses when given in drinking water or by gavage. There is no evidence to indicate it causes birth defects in humans. Prolonged overexposure to Silica may cause adverse effects to the reproductive system.

Prolonged overexposure to Mineral Spirits or V. M. & P. Naptha may cause adverse effects to the liver and urinary systems.

Rate exposure to titanium dioxide dust at 250 mg./m3 developed lung cancer, however, such exposure levels are not attainable in the workplace.

Section VI — REACTIVITY DATA

STABILITY — Stable

CONDITIONS TO AVOID

None known.

INCOMPATIBILITY

None known.

HAZARDOUS DECOMPOSITION PRODUCTS

By Fire: Carbon Dioxide, Carbon Monoxide

HAZARDOUS SUBSTANCES HANDLING

Will Not Occur

Section VII — SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

VENTILATE AND REMOVE WITH INERT ABSORBENT.

HAZTE DISPOSAL METHOD

Waste from these products is not hazardous as defined under the Resource Conservation and Recovery Act (RCRA 40 CPR 261). Dispose of in accordance with Federal, State, and Local regulations regarding pollution.

Section VIII — PROTECTION INFORMATION

PRECAUTIONS TO BE TAKEN IN USE

Use only with adequate ventilation. Avoid breathing vapor. Avoid contact with skin and eyes. Wash hands after using.

These coatings may contain materials classified as nuisance particulates (listed as Russia Dust in Section II) which may be present at hazardous levels only during sanding or abrading of the dried film. If no specific dusts are listed in Section II, the allowable limits for nuisance dusts are ACGIH TLV's 10 mg./m3 (total dust), 5 mg./m3 (respirable fraction).

VENTILATION

Local exhaust preferable. General exhaust acceptable if the exposure to materials in Section II is maintained below applicable exposure limits. Refer to OSHA Standards 1910.94, 1910.107, 1910.108.

AIRBORNE PROTECTION

If personal exposure cannot be controlled below applicable limits by ventilation, wear a properly fitted organic vapor/particulate respirator approved by NIOSH/MSHA for protection against materials in Section II.

When sanding or abrading the dried film, wear a dust/mist respirator approved by NIOSH/MSHA for protection against non-veletal materials in Section II.

RESPIRATORY PROTECTION

None required for normal operation of limited duration is expected. For long or repeated contact, wear chemical resistant gloves.

SKIN PROTECTION

Wear safety spectacles with unperforated side shields.

Section IX — PRECAUTIONS

COLD STORAGE CATEGORY — Not Applicable

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Containers should be tightly closed when not in use. Transfer only to approved containers with complete and appropriate labeling. Do not take internally. Keep out of reach of children.

Section X — OTHER REGULATORY INFORMATION

NARA 113 (40 CFR 372, 6 SC) SUPPLIER NOTIFICATION

Asbestos is only the chemical in these products which requires reporting under the NARA 113 regulations. See table for applicable products containing this chemical.

CALIFORNIA PROPOSITION 65

WARNINGS. These products, except for C-99, contain a chemical(s) known to the State of California to cause cancer.

This Material Safety Data Sheet conforms to the Hazard Communication standard, 29 CFR 1910.1200(g)(4), for similar complex mixtures.

The above information pertains to these products as currently formulated, and is based on the information available at this time. Addition of reducers or other additives to these products may substantially alter the composition and hazards of the products. Since conditions of use are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information.
