Sustainability at MxCC

MxCC is Going Green!
Sustainability means meeting the needs of the present without compromising the ability of future generations to meet their own needs.

MxCC strives to lead the sustainability efforts of the region through modeling sustainable practices and educating students and the community about conservation and environmental stewardship. In April 2012, MxCC President Anna Wasescha signed the American College and University Presidents’ Climate Commitment (ACUPCC). The President’s Climate Action Response Team (PCART) was formed to address the reporting requirements of this commitment. With input and support from the college and outside community. MxCC’s first climate action plan was completed in February of 2015 and filed with the ACUPCC.

A copy of MxCC’s climate action plan can be found here.

We are incorporating sustainability initiatives into every aspect of the college, including daily operations, curriculum, student life, and community outreach.

Current initiatives include:

- Maintaining ongoing communication with the community such as through this website
- Awaiting system-wide Energy Audit recommendations
Waste Reduction Suggestion Boxes

- Recycling workshop/improved signage
- Composting suggestions
- Campus policy on use of water bottles
- Used school supply swap
