Welcome to the 2010-2011 Academic Year!

The mission of the Advising Center is to promote advising, as a comprehensive campus process, while assisting the University in achieving its student enrollment goals and retention initiatives. The Center (1) administers the advising component of the University’s new student registration process, (2) offers academic support services designed to challenge first-year students to become engaged learners, who are responsible for their intellectual and personal development, (3) provides supplemental advising services to upper-level students, and (4) sponsors advisor development and support services for academic departments and faculty members.

Susan Heyward, Director of the Advising Center
