Calculus: Early Transcendentals, 6th edition by James Stewart. However, if you are planning
to take only Calculus I, the cheapest option will be to by the first book; if you are taking later

Office hours: MF 10:00-12:00 noon, W 10:00-11:00 am.
Prerequisites: MAT 130 or placement at this level.
Course topics: Study of limits, continuity, differentiation and applications, anti-differentiation
(time permitting).
Class format: Each class meeting will consist of a lecture and include related problem solving.
We will also study the use of an advanced calculator in solving calculus problems.
Attendance: It is expected that you be there on time for each and every class. If for some
reason you should miss a class, then it is your responsibility to find out from a friend what has
been covered and assigned and make it up.
Homework: After each class you will get a homework assignment. It will not be collected and
graded, but must be completed and should prepare you for the quizzes. I cannot stress enough
the importance of doing the homework. It is a critical factor in building and reinforcing your
knowledge, as well as helping you identify your week points.
Quizzes: Quite often at the beginning of class time there will be a short quiz. This should
keep you alert and following the material carefully, closely and timely.
Exams: There will be two longer exams throughout the semester. Their dates will be an-
nounced at least a week in advance.
Final Exam: A cumulative final exam will take place on Wed, May 19, 2010, 12:30-2:30 pm.
Evaluation: The quizzes will account for 15% of your grade, the two longer exams will account
for 25% each and the final exam will account for the remaining 35%.
Grades: The ranges for the grades are the following:

<table>
