INDIVIDUALIZED MAJOR PLAN

The Individualized Major Plan is a **self-designed interdisciplinary plan of study**, which consists of courses from two or more disciplines and results in a B.A. or B.S. degree. The self-designed plan of study allows you to take courses in areas that naturally complement each other in today's workplace and to develop a strong educational base in at least one subject to facilitate entrance into a graduate program.

The goals of an Individualized Major are to: a) enhance your ability to integrate method and content from two or more academic disciplines while meeting your educational interests and career objectives; and, b) provide you with flexible career skills to meet the challenges of a society undergoing rapid technological change.

The Individualized Major shall consist of **at least 36 credits**, taken in **two or more** disciplines. At least 18 of the 36 credits shall come from one discipline and consist of courses designed for departmental majors. The majority of the courses applied to the major should be at the 300-level or above; no 100-level courses may be included in the major. You may apply **no more than 6 credits of Independent Study/Internships/Field Placement** coursework towards the 36 credits in the major. The Independent Study should be directly related to and reflecting the interdisciplinary theme of the proposed plan of study.
