BIS-AITP Cambridge Trip

On November 22, 2019, AITP members went on a trip to the greater Boston area to visit various locations in Cambridge MA. Much of the trip was spent within the Massachusetts Institute of Technology museum. The museum had a collection of holography, technology-related artworks, artificial intelligence, robotics, maritime history, and the history of MIT. BIS-AITP members explored the museum and its many exhibits and then enjoyed a dinner in Cambridge.
