Google Technical Program Manager Q&A

On Tuesday, March 23rd, 2023 the BIS Club welcomed a proud alumni guest speaker: Nate Belay. Nate graduated Eastern in 2020 as a Computer Science and Business Information Systems double major in the Honors Program. He emphasized how important courses such as BIS 370 Systems Analysis and Design, BIS 373 Business Database Management, BIS 437 Rapid IT Development and Java were to his career and overall employability. He started his journey in 2020 as a Program Manager at PTC. He said he took a lot of great things from this job and really liked being able to directly talk to the leaders at the company. However, in 2022, Nate started at Google! At Google, Nate is a Technical Program Manager in the Android Engineering department. He gave a presentation on all the cool things he does at Google and then answered student questions for an hour. We learned a lot of insightful information about him and the students loved eating pizza and pop with him!
