AITP - BIS/CS Resume Writing Workshop with Alumni & Representatives

Eastern BIS and CS alumni and company representatives from Cigna and Travelers joined Eastern BIS-AITP Student Chapter members, Business Information Systems and Computer Science students for this semester's first resume writing workshop. Students enjoyed pizza and soda during a short presentation about the general outline of a resume, tips, tricks and strategies for a good resume, what not to do and more. A few big points made were to always tailor your resume to the job posting, only include relevant information and the importance of being on LinkedIn. This presentation ended with employer resume advice and pet peeves followed by a few questions from students about resumes, cover letters and applying to internship and career jobs.

After this, alumni and company representatives spent one-on-one time with students reviewing their resumes, offering suggestions to better prepare students for job applications. This event hosted by Eastern's AITP Student Chapter has become a reoccurring semester event to encourage biz-tech students to improve their resumes and to prepare them for work in business-technical career fields.
