

AITP - BIS/CS Resume Writing Workshop with Alumni & Representatives

On Wednesday, February 26, 2020. Eastern BIS and CS alumni and company representatives from Cigna and Travelers like John Brochure, Kyle Coleman, Ryan Schomer, Alex Stewart, and Jaquelyn Moller joined Eastern BIS-AITP Student Chapter members, Business Information Systems and Computer Science students for this semester's first alumni-employer resume writing workshop. Students enjoyed pizza and soda during a brief introduction by Dr. Citurs based upon the "Technical Resume Getting Started Workshop" he led a week earlier.

A few big points stressed again by alumni and employer reps were to always tailor your resume to the job posting, only include relevant information, proper formatting and the importance of being on LinkedIn.

After this, alumni and company representatives spent one-on-one time with students reviewing their resumes, offering suggestions to better prepare students for job applications. This event hosted by Eastern's AITP Student Chapter has become a reoccurring semester event to encourage biz-tech students to improve their resumes and to prepare them for work in business technical career fields. Below are alumni reps who reviewed resumes along with Dr. Citurs.
