

BIS/AITP-Summer/Fall Travelers BI&A Internship and Career Program Info Session

On Wednesday, March 24th, 2021 at 3:30 pm, BIS and AITP students gathered in Zoom to attend an information session about the Travelers Business Insights and Analytics (BIA) Programs. These programs include the Travelers BIA internship and early career development sub-programs. The BIS program alumni conducting the info session included: Vanessa Zetino Granados – Analyst, Peter Ereshena – Data Engineer, Mike Zisk – Personal Insurance Business Architecture. A total of over twenty BIS and AITP students attended the event and furthered their knowledge on the Traveler’s BIA program. The guest speakers were able to convey their program in that short amount of time that allowed students to retain the information. The BIA program is split into five concentrations: information delivery, data engineering, business analysis, data management and business performance analytics. The guest speakers went over technical skills that they look for in applicants such as database, SQL, business intelligence and analytics, discussed the importance of integrating these skills in the business world. One of the main topics they stressed is the importance for students to apply as early as the Fall Semester or late August. Also, they mentioned insurance and how students should have some interest in the field. Though the idea did not entice students, so to remedy the situation they quickly excited students by saying this not the most important part of the job. That students will mainly be focusing on information technology. The alumni stressed how they receive great mentorship in Travelers BIA and throughout the internship process and early career program. Students were shown a presentation and had the opportunity to ask questions. The session lasted for about a half an hour.

to be a part of the BI&A Leadership Development program?

Program Requisition Numbers

- Internship**
 - BI LDP Internship: R-2957
 - Geospatial LDP Internship: R-2961
