The 2019 Fall Student Club Fair and President’s Picnic was held on Thursday, September 5th. The Department of Business Administration had several tables for the related student clubs and organizations. Department student clubs that were represented at the fair included the Association of Information Technology Professionals, American Marketing Association, Eastern Accounting Society, the Finance Student Association, Entrepreneurship Club, Women in Business, Institute of Management Accounts, Investment Club and the Society for Human Resources Management. The goals of these clubs are to get students engaged in student-run academic organizations. Thus, this social-academic club engagement helps students develop their leadership and related professional skills as well as provide them insights into the opportunity that exists in their field of study and ultimately to advance their future careers.
