

Traveler's BI&A Q&A Panel

On Thursday, March 2nd, 3 alumni from Travelers came to Eastern to hold an information session about the Traveler's Business Insight and Analytics Leadership Development Program (BI&A LDP), which was a delay from February 28th due to a winter storm. This was unlike other info-sessions in the past though. Each alumni sat down and spoke to us about what they do in their-day to day role and club members were able to ask specific questions about their role. The 3 different roles discussed were Business Analyst, Information Delivery, and Data Engineer. In BI&A there are a total of 6 different roles, the previous roles mentioned along with Business Performance Analytics, Data Management, and Geospatial. After the event, we ate pizza with the alumni. This was a great opportunity for students to learn more in-depth information about potential job roles they could go in to and make personal connections with alumni in the industry.
