page 2 Section 3 -- HAZARDS IDENTIFICATION _____ ROUTES OF EXPOSURE INHALATION of vapor or spray mist. EYE or SKIN contact with the product, vapor or spray mist. EFFECTS OF OVEREXPOSURE EYES: Irritation. SKIN: Prolonged or repeated exposure may cause irritation. INHALATION: Irritation of the upper respiratory system. May cause nervous system depression. Extreme overexposure may result in unconsciousness and possibly death. SIGNS AND SYMPTOMS OF OVEREXPOSURE Headache, dizziness, nausea, and loss of coordination are indications of excessive exposure to vapors or spray mists. Redness and itching or burning sensation may indicate eye or excessive skin exposure. MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE None generally recognized. CANCER INFORMATION For complete discussion of toxicology data refer to Section 11. Section 4 -- FIRST AID MEASURES _____ _____ EYES: Flush eyes with large amounts of water for 15 minutes. Get medical attention. SKIN: Wash affected area thoroughly with soap and water. Remove contaminated clothing and launder before re-use. INHALATION: If affected, remove from exposure. Restore breathing. Keep warm and quiet. Do not induce vomiting. INGESTION: Get medical attention immediately. Section 5 -- FIRE FIGHTING MEASURES _____ LEL UEL 1.0 13.1 FLASH POINT Propellant < 0 FEXTINGUISHING MEDIA Carbon Dioxide, Dry Chemical, Foam UNUSUAL FIRE AND EXPLOSION HAZARDS Containers may explode when exposed to extreme heat. Application to hot surfaces requires special precautions. During emergency conditions overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain medical attention. SPECIAL FIRE FIGHTING PROCEDURES Full protective equipment including self-contained breathing apparatus should be used. Water spray may be ineffective. If water is used, fog nozzles are preferable. Water may be used to cool closed containers to prevent

pressure build-up and possible autoignition or explosion when exposed to

1601	page 3
Section 6 ACCIDENTAL RELEASE MEASURES	
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED Remove all sources of ignition. Ventilate the area. Remove with inert absorbent.	
Section 7 HANDLING AND STORAGE	
STORAGE CATEGORY Not Available PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE Keep away from heat, sparks, and open flame. Vapors will ac readily and may ignite explosively. During use and until all vapors are gone: Keep area ventila smoke - Extinguish all flames, pilot lights, and heaters - Turr electric tools and appliances, and any other sources of ignitic Consult NFPA Code. Use approved Bonding and Grounding proce Contents under pressure. Do not puncture, incinerate, or ex temperature above 120F. Heat from sunlight, radiators, stoves, and other heat sources could cause container to burst. Do not internally. Keep out of the reach of children.	ated - Do not n off stoves, on. edures. kpose to hot water,
Section 8 EXPOSURE CONTROLS/PERSONAL PROTECTION	
<pre>PRECAUTIONS TO BE TAKEN IN USE Use only with adequate ventilation. Avoid contact with skin and eyes. Avoid breathing vapor and Wash hands after using. This coating may contain materials classified as nuisance pa (listed "as Dust" in Section 2) which may be present at hazardo only during sanding or abrading of the dried film. If no spec- are listed in Section 2, the applicable limits for nuisance dus TLV 10 mg/m3 (total dust), 3 mg/m3 (respirable fraction), OSHA (total dust), 5 mg/m3 (respirable fraction). Removal of old paint by sanding, scraping or other means may dust or fumes that contain lead. Exposure to lead dust or fume brain damage or other adverse health effects, especially in chi pregnant women. Controlling exposure to lead or other hazardou requires the use of proper protective equipment, such as a prop respirator (NIOSH approved) and proper containment and cleanup. information, call the National Lead Information Center at 1-800 (in US) or contact your local health authority. VENTILATION Local exhaust preferable. General exhaust acceptable if the materials in Section 2 is maintained below applicable exposure Refer to OSHA Standards 1910.94, 1910.107, 1910.108. RESPIRATORY PROTECTION If personal exposure cannot be controlled below applicable is ventilation, wear a properly fitted organic vapor/particulate is approved by NIOSH/MSHA for protection against materials in Sect When sanding or abrading the dried film, wear a dust/mist re approved by NIOSH/MSHA for dust which may be generated from this underlying paint, or the abrasive.</pre>	articulates bus levels ific dusts sts are ACGIH PEL 15 mg/m3 y generate es may cause ildren or us substances berly fitted . PROTECTIVE GLOVES None required for normal application of aerosol products where minimal skin contact is expected. For long or repeated contact, wear chemical resistant gloves. EYE PROTECTION Wear safety spectacles with unperforated sideshields. OTHER PRECAUTIONS Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

Section 11 -- TOXICOLOGICAL INFORMATION

CHRONIC HEALTH HAZARDS

Ethylbenzene is classified by IARC as possibly carcinogenic to humans (2B) based on inadequate evidence in humans and sufficient evidence in laboratory animals. Lifetime inhalation exposure of rats and mice to high ethylbenzene concentrations resulted in increases in certain types of cancer, including kidney tumors in rats and lung and liver tumors in mice. These effects were not observed in animals exposed to lower concentrations. There is no evidence that ethylbenzene causes cancer in humans.

There is no evidence that ethylbenzene causes cancer in humans. Carbon Black is classified by IARC as possibly carcinogenic to humans (group 2B) based on experimental animal data, however, there is insufficient evidence in humans for its carcinogenicity.

Methyl Ethyl Ketone may increase the nervous system effects of other solvents.

Prolonged overexposure to solvent ingredients in Section 2 may cause adverse effects to the liver, urinary, blood forming and reproductive systems.

Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

CALIFORNIA PROPOSITION 65 WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. TSCA CERTIFICATION All chemicals in this product are listed, or are exempt from listing, on the TSCA Inventory.				
Section 16 OTHER INFORMATION				
This product has been classified in accordance	with the hazard criteria			

This product has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR.

The above information pertains to this product as currently formulated, and is based on the information available at this time. Addition of reducers or other additives to this product may substantially alter the composition and hazards of the product. Since conditions of use are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information.
