### POTENTIAL HEALTH EFFECTS (See Section 11 for toxicological data.)

**EYE:** May cause severe irritation with corneal injury which may result in permanent impairment of vision, even blindness. Chemical burns may occur.

**SKIN:** Prolonged or repeated exposure may cause skin irritation, even a burn. Skin contact may cause an allergic skin reaction. Prolonged skin contact is unlikely to result in absorption of harmful amounts.

**INGESTION:** Moderate toxicity if swallowed. Small amounts swallowed incidental to normal handling operations are not

likely to cause injury; however, swallowing larger amounts may cause serious injury, even death.

**INHALATION:** Dust may cause irritation to upper respiratory tract (nose and throat). Exposure to dust from the tablets is however unlikely.

**SYSTEMIC (OTHER TARGET ORGAN) EFFECTS:** Excessive exposure may increase the blood and tissue levels of bromine. Observations in animals include kidney effects following repeated ingestion of active ingredient, but no evidence of systemic toxicity following repeated dermal exposure at maximum attainable doses. For the minor component(s): In humans, symptoms may include decreased blood clotting time.

**CANCER INFORMATION:** No relevant information found.

**TERATOLOGY (BIRTH DEFECTS):** No relevant information found.

**REPRODUCTIVE EFFECTS:** Contains component(s) which did not interfere with reproduction in animal studies. The component(s) is/are DENPA.

#### 4. FIRST AID

**EYE:** Immediately flush eyes with water; remove contact lenses, if present, after the first 5 minutes, then continue flushing eyes for at least 15 minutes. Obtain medical attention without delay, preferably from an ophthalmologist.

**SKIN:** Wash skin with plenty of water.

**INGESTION:** If swallowed, induce vomiting immediately as directed by medical personnel. Never give anything by mouth to an unconscious person. Seek medical attention immediately.

**INHALATION:** Move person to fresh air; if effects occur, consult a physician.

**NOTE TO PHYSICIAN:** If burn is present, treat as any thermal burn, after decontamination. No specific antidote. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient.
