

EES 271 EXTENDED FIELD COURSE, MAY 2024

“Summits and Seashores”

A 12-day field course to explore the geology and environmental science of New Hampshire’s White Mountains, New England gemstone mines, and earth and environmental science highlights of Maine’s Acadia National Park.

This 3-credit elective course is open any EES Major following completion of the EES 104 or 110-112 course. Stay tuned for further information during the fall 2023 semester, including, itinerary, dates and costs.
